1
00:00:05,810 --> 00:00:19,820
(Yochai Eisenberg)
Hi there, and this video is to help describe an interactive map
developed for the immigrant and refugee led capacity development
network of Illinois.

2
00:00:19,820 --> 00:00:26,050
And excited to share a little bit about how it works and how you can
use this map.

3
00:00:26,050 --> 00:00:37,840
What appears as you go to the link for this map is just an overview
pop up that describes the map and how

4
00:00:37,840 --> 00:00:47,420
you can use click on each of the points and how you can filter the
data to view certain parts of it.

5
00:00:47,420 --> 00:00:54,740
So let's go over it, clicked OK, and now we are in the interactive map
and as you can see, first off,

6
00:00:54,740 --> 00:01:07,590
we're just looking at all of Illinois and we're viewing the 17
Illinois welcoming centers and some of the names for these centers
appear,

7
00:01:07,590 --> 00:01:13,400
But you can also click on them if any of them are not appearing
because of space wise they may not appear.

8
00:01:13,400 --> 00:01:18,710
You can click on them to see the information about each center.

9
00:01:18,710 --> 00:01:23,720
So this one is the Sal Family and Community Center,

10
00:01:23,720 --> 00:01:32,770
That is in Moline, Illinois, and has about 17 partners listed.

11
00:01:32,770 --> 00:01:40,660
Some of the other features of the map, some of the basic ones besides
being able to click on the points, is that you can zoom in and out.

12
00:01:40,660 --> 00:01:45,310
So I'm just scrolling with my mouse, zooming in and out.

13
00:01:45,310 --> 00:01:56,950
You can also zoom in and out in the upper left here. As well as zoom
to particular addresses or places in the search bar.

14
00:01:56,950 --> 00:02:02,770
The thing you could do is see that the layers that are on this
interactive map in the upper right.

15
00:02:02,770 --> 00:02:16,680
This is the legend tab we have here and then this kind of pile of
papers all the way over is the list of layers that are on this map.

16
00:02:16,680 --> 00:02:22,190
So there's two sets of data that are actually for welcoming centers.

17
00:02:22,190 --> 00:02:27,620
One is for those prior to twenty twenty one and one is for those after
twenty twenty one,

18
00:02:27,620 --> 00:02:31,340
That now includes thirty one welcoming centers.

19
00:02:31,340 --> 00:02:43,190
And you can see what we've organized for this map is a list of the
resources that welcoming centers could potentially use in their map.

20
00:02:43,190 --> 00:02:55,580
We have also a list of the partners that welcoming centers have listed
that they work with to serve their clients.

21
00:02:55,580 --> 00:03:06,480
And then there's a line showing a connection from each of the

welcoming centers to their partner and then what are called service
areas,

22
00:03:06,480 --> 00:03:14,780
that these are comprised of the zip codes that each of the welcoming
centers has described it provides services to.

23
00:03:14,780 --> 00:03:21,680
So let's go in and as you can see, there's a lot a lot of the layers
are not view viewed right now.

24
00:03:21,680 --> 00:03:25,400
And as you can see, that they're gray and gray over here on the right.

25
00:03:25,400 --> 00:03:31,880
But as we zoom in, I'm going to zoom in to Cass County Health
Department's Welcoming Center.

26
00:03:31,880 --> 00:03:36,620
As I zoom in, the other layers start to turn on,

27
00:03:36,620 --> 00:03:50,720
so what we see here is the Cass County Health Department and there's a
connection to each of its partners.

28
00:03:50,720 --> 00:04:01,060
And as we zoom in a little more. What we see is that the the labels
for these places should turn on so that one can

29
00:04:01,060 --> 00:04:08,340
view the names of each of the partners as well as the names for each
of the,

30
00:04:08,340 --> 00:04:10,270
We have these triangles

31
00:04:04:10,270 --> 00:04:22,460
Here are the different resources which we've categorized as resources
from a college disability services organization and vocational rehab
center.

32
00:04:22,460 --> 00:04:31,780
You can also click on any of these and a little pop up will show the name if the label doesn't appear.

33
00:04:31,780 --> 00:04:37,570
So those that's how this is organized, another feature you can do is is called panning.

34
00:04:37,570 --> 00:04:46,390
So you grab the map and you can pan around to potentially get to one of the other areas.

35
00:04:46,390 --> 00:04:50,620
Now, I'm showing the Sal family community services area.

36
00:04:50,620 --> 00:04:55,720
So that's another way to navigate around the map again.

37
00:04:55,720 --> 00:05:03,100
One other feature is this, this purple line dotted line, that's the service area that's listed now.

38
00:05:03,100 --> 00:05:10,810
Right now, we're reviewing all of the welcoming centers as a whole and zooming out now.

39
00:05:10,810 --> 00:05:20,710
And it can get kind of messy, you can see all this data now appears as we zoom in because we're looking at the data for all the welcoming centers.

40
00:05:20,710 --> 00:05:25,770
We're looking at all the zip codes they serve, all their partners and all those connections.

41
00:05:25,770 --> 00:05:31,750
So it's really a neat interlocking web of services that appear here.

42

00:05:31,750 --> 00:05:38,470
But oftentimes we just want to see one center and its service area and the partners that it listed,

43
00:05:38,470 --> 00:05:46,510
So I'm going to close this layer list and zoom out a little bit, back to where we were.

44
00:05:46,510 --> 00:05:50,410
And then I'm going to use a feature called Filter,

45
00:05:50,410 --> 00:05:58,780
actually called Group Filter that allows us to filter the layers based on one of the welcoming centers.

46
00:05:58,780 --> 00:06:08,230
So I'm going to click on this button and the only piece that's needed to fill out is where it says empty here.

47
00:06:08,230 --> 00:06:15,070
These other pieces of information, you can leave the saying this is just the way that the search and filter is set up.

48
00:06:15,070 --> 00:06:21,490
So I'm going to click on here and filter to this Cass County welcoming center.

49
00:06:21,490 --> 00:06:33,960
So I click on that and then I click on apply, and what you could see happens is the map zooms in to that welcoming center.

50
00:06:33,960 --> 00:06:39,150
And it's showing the extent of all its partners, so for Cass County,

51
00:06:39,150 --> 00:06:47,190
the extent is kind of around its area and the county that it's serving and you can see these are the different

52
00:06:47,190 --> 00:06:56,340
partners that it's connected to and the zip code for this zip code

service area for this welcoming center.

53
00:06:56,340 --> 00:07:00,960
Another feature that you can see here is the print.

54
00:07:00,960 --> 00:07:12,950
Oh, before I leave this one, you can always also hit the reset button,
to reset and turn back on all the other layers.

55
00:07:12,950 --> 00:07:21,050
Now if you just wanted the map of the one, I can go and click on the
Cass County welcoming center, click apply again.

56
00:07:21,050 --> 00:07:31,990
And then this is another feature where you can print the map here for
the Cass County Welcoming Center.

57
00:07:31,990 --> 00:07:40,630
So that's an overview of how this map works, and as you can see,
there's a lot of interesting data,

58
00:07:40,630 --> 00:07:54,010
a lot of interesting connections that a user can explore for the
welcoming center system as a whole, as well as individual welcoming
centers.

59
00:07:54,010 --> 00:07:58,920
Thank you very much for watching.
